

The Rice University Chemical and Biomolecular
Engineering Department presents:

THE CHEVRON LECTURE ON ENERGY

America's Prosperity Through America's Energy:
Our Sustainable 21st Century Opportunity

Tuesday, April 7, 2015
Cohen House
6:30 p.m

John Hofmeister

Founder and Chief Executive of Citizens for Affordable Energy,
Former President Shell Oil Company

ABSTRACT

John Hofmeister's remarks will describe a pathway to unprecedented 21st Century prosperity and environmental sustainability for the present and future generations of Americans and, by our interconnectedness, the rest of the world.

ABOUT

John Hofmeister

After retiring from the Shell Oil Company in 2008, John Hofmeister founded Citizens for Affordable Energy, a public policy education firm that promotes energy security solutions. Hofmeister became president of Shell in 2005 and headed the U.S. Country Leadership Team, which included leaders of all Shell businesses in the U.S. Previously he had served as Group Human Resource Director of the Shell Group, based in The Hague.

As Shell president, Hofmeister launched an outreach program to address critical global energy challenges. As an executive for more than 35 years, he held leadership positions at General Electric, Nortel and AlliedSignal (now Honeywell International). Hofmeister serves as chair of the National Urban League and is a member of the U.S. Department of Energy's Hydrogen and Fuel Cell Technical Advisory Committee. He serves on the boards of the Foreign Policy Association, the Gas Technology Institute and the Center for Houston's Future.

RSVP at bit.ly/chevronlecture by Friday, April 3rd

A reception will begin at 5:30 p.m.

Following the lecture there will be a networking and poster session with coffee and desserts served.

Sponsored by the Department of Chemical and
Biomolecular Engineering and Chevron.
